

C3541 Bayliss Super Power Tube Replacement

1. Cool the power tub (in a refrigerator) for approx 20 min.
2. Push the piston rod back into the tube.
3. Remove existing opener from window.
4. Remove the lock washer from one end of the pin holding the bottom of the tube.
5. Carefully slide the pin out of the tube.
6. Unscrew the other end from the adjustment screw.
7. Screw the threaded end of the replacement tube into the adjustment knob.
8. Line the other end up with the brackets and slide the pin into place. (see drawing)
9. Fit the new lock washer over the end of the pin (make sure to not push the other lock washer off the other side of the pin).
10. Reinstall the opener in your window.
